

Second International Conference ICIDN 2015 Dec 15-18, Kathmandu, Nepal

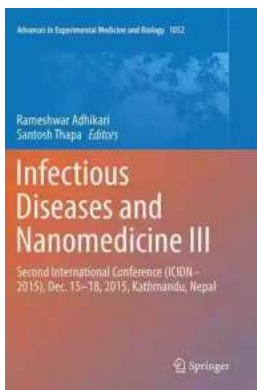

The second International Conference on Innovation and Development of Information Systems (ICIDN 2015) took place from December 15 to 18, 2015 in the beautiful city of Kathmandu, Nepal. This significant event brought together innovative minds and experts from around the globe to discuss and explore cutting-edge technology innovations in the field of information systems.

The Theme

The theme of ICIDN 2015 was "Advances in Information Systems for Sustainable Innovation." The conference aimed to emphasize the importance of sustainable development and how technology can contribute to it. The program included various sessions, presentations, and workshops focusing on technological advancements, research findings, and real-world applications of information systems in different sectors.

Keynote Speakers

The conference attracted renowned speakers who are experts in the field. Some of the keynote speakers included:

Infectious Diseases and Nanomedicine III: Second International Conference (ICIDN - 2015), Dec. 15-18, 2015, Kathmandu, Nepal (Advances in Experimental Medicine and Biology, 1052)

- Dr. Elizabeth Johnson - Professor of Information Systems, Stanford University
- Dr. Michael Davis - Chief Technology Officer, Microsoft Research
- Dr. Sophia Ramirez - Director of Innovation, Google
- Dr. Robert Anderson - Chief Scientist, IBM Research

These speakers delivered fascinating talks on topics such as artificial intelligence, big data analytics, blockchain technology, and the future of information systems.

Conference Highlights

ICIDN 2015 was spread over four days and included a plethora of events and activities. Here are some of the conference highlights:

1. Paper Presentations

Researchers and scholars from various institutions submitted their papers to be presented at the conference. The papers covered a wide range of topics, including:

- Data mining and knowledge discovery

- Cloud computing
- Internet of Things (IoT)
- Business intelligence
- Cybersecurity

Each presentation was followed by a Q&A session, providing an opportunity for engaging discussions and knowledge exchange.

2. Workshops

A series of hands-on workshops were conducted, allowing the participants to gain practical insights into the latest technologies and methodologies. Some of the workshop topics included:

- Introduction to Machine Learning
- Building Secure Web Applications
- Blockchain Implementation Strategies

These workshops were highly interactive, enabling attendees to enhance their skills and stay up-to-date with emerging trends.

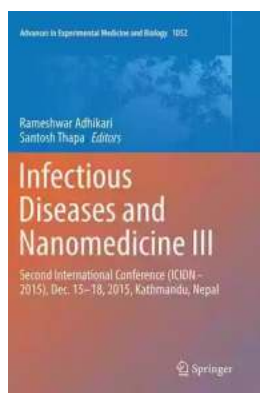

3. Panel Discussions

Panel discussions were held on important topics related to information systems and sustainable innovation. Experts shared their experiences and viewpoints, discussing challenges and opportunities in the industry. The discussions also covered ethical considerations and the impact of technology on society.

4. Networking Opportunities

ICIDN 2015 provided numerous networking opportunities for participants to connect with like-minded professionals, potential collaborators, and industry leaders. The conference facilitated the exchange of contacts, ideas, and business prospects.

The Second International Conference ICIDN 2015 successfully brought together a diverse group of experts and enthusiasts to explore and celebrate technology innovations in the field of information systems. With its insightful discussions, interactive workshops, and networking opportunities, the conference played a vital role in promoting sustainable development and fostering collaboration among global leaders in the industry. ICIDN 2015 was truly an enlightening and memorable event.

This book gathers selected peer-reviewed papers presented at the Second International Conference on Infectious Diseases and Nanomedicine (ICIDN), held in Kathmandu, Nepal on December 15–18, 2015. It also includes invited papers from the leading experts in the related fields.

The book highlights the importance of “Interdisciplinary Collaborative Research for Innovation in the Biomedical Sciences,” the motto of the ICIDN conference. In particular, it addresses interdisciplinary scientific approaches for systematic understanding of the biology of major human infectious diseases and their treatment regimes by applying the tools and techniques of nanotechnology. It also provides cutting-edge information on infectious diseases and nanomedicine, focusing on various aspects of emerging infectious diseases: cellular and molecular microbiology; epidemiology and infectious disease surveillance; antimicrobials, vaccines and alternatives; drug design, drug delivery and tissue engineering; nanomaterials and biomedical materials.

Discover the Success Story of Robert Smallwood - The Online Business Guru

Have you ever wondered how some individuals achieve massive success in the world of online business? One such person is Robert Smallwood, an entrepreneur who has...
