Considering this book, my Indian publisher wrote: "... on a flight, reading your book, I was with you climbing mountains and crossing streams, and on your spiritual journey too. Only touchdown brought me back to the concrete jungle."

In reflective Himalayan travel and adventure stories, philosophical tales of my life in India and before coming to India, and essays on the Big Questions, this book develops a radically different perspective on existence, thought and reality, putting out of joint the modern, Western-originated, individualist, materialist reality that imprisons the lives and thoughts of us all. This is a book that lives and thinks otherwise, and may be revelatory and transformative for those who are ready to think outside of their certainties.

Nothing dethrones that modern "master-of-its-fate, captain-of-its-soul" narrative more powerfully than trekking in the Himalaya and living in traditional India. In these Ways and Weighings, life emerges as a vast cosmic and social unfolding,

in which harmony with oneself, with others and with the natural world is the highest value, most conducive to individual and social well-being, and happiness.
